SOC Security Monitoring Dashboard

A cybersecurity SOC dashboard built using Splunk Cloud to monitor simulated authentication events, analyse failed login attempts, identify suspicious IP addresses, and detect potential brute-force attacks.

Global Time Range

All time

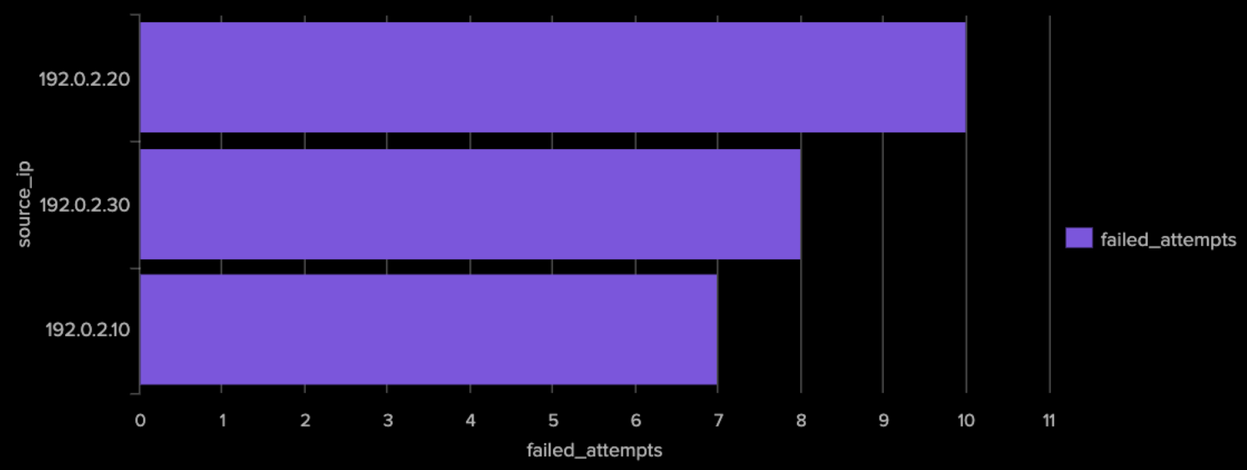

Total Security Events

200

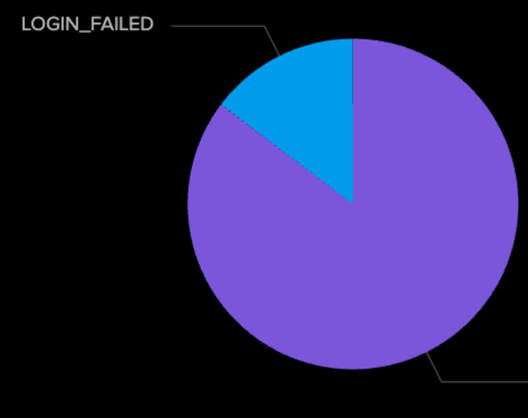

Failed Login Attempts

55

Top 10 IPs by Failed Login Attempts

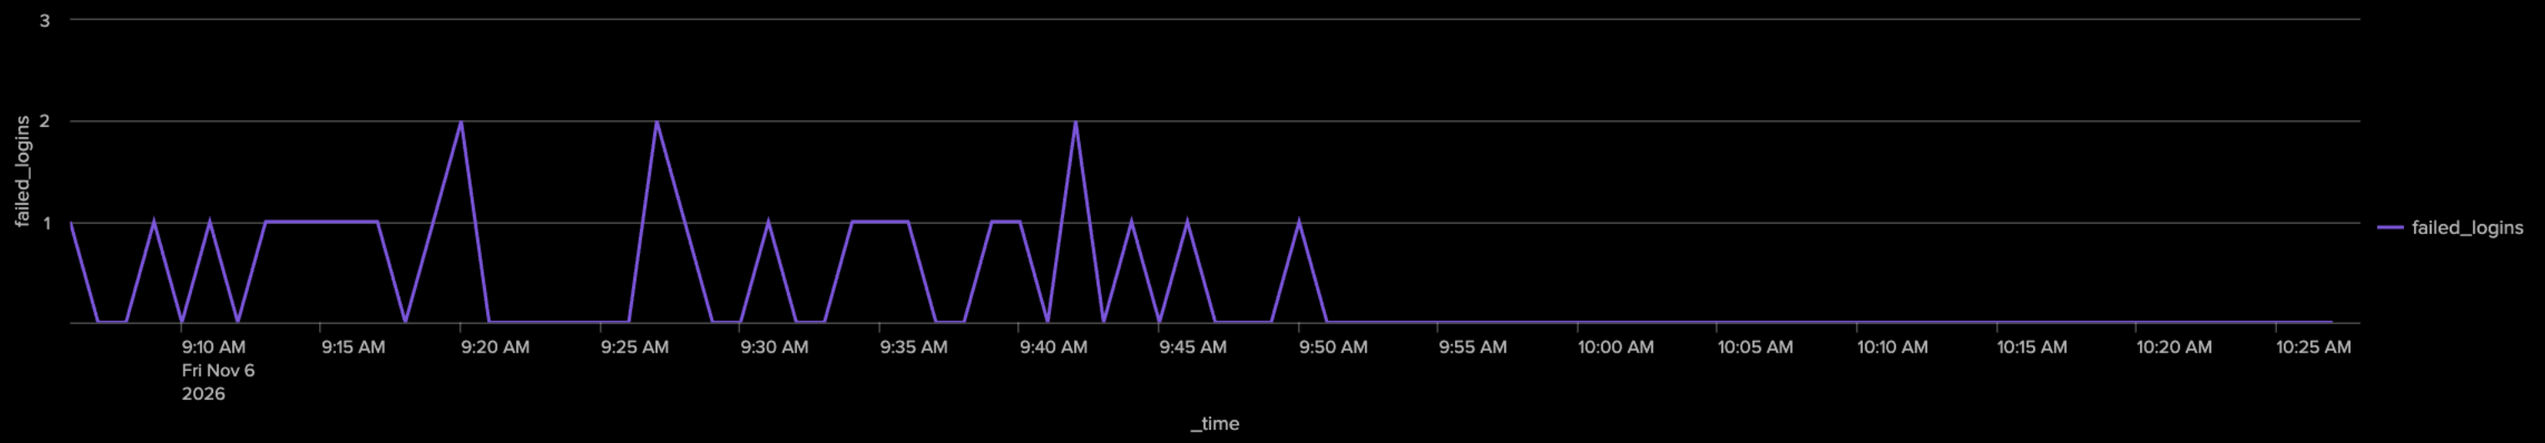

Security Event Breakdown

Failed Login Attempts Over Time

Displays failed authentication attempts per minute to help identify unusual login activity and potential brute-force attacks.

Suspicious IP Addresses

source_ip ↕	failed_attempts ↕
203.0.113.50	30
